

Sustainable Design Assessment for Planners - Training Course

What this Course Offers:

- An introduction to the **Sustainable Design Assessment in the Planning Process (SDAPP) Framework** used by Councils.
- An understanding of **Environmentally Sustainable Design (ESD) and Sustainability** within statutory planning frameworks.
- Insight into the **Key Sustainability Criteria**:
 - ✓ **Management**
 - ✓ **Water**
 - ✓ **Energy**
 - ✓ **Stormwater**
 - ✓ **Indoor Environment Quality**
 - ✓ **Transport**
 - ✓ **Waste**
 - ✓ **Urban Ecology**
 - ✓ **Innovation**
- An overview of online **Assessment Tools** used by applicants to assess developments.
- **Quick, online training**, undertaken at your own pace with videos and self-help quizzes to reinforce learning.
- An understanding of new **ESD and Stormwater planning policies**, including how referrals processes work and how to assess a Sustainable Design Assessment (SDA) report.

Equipping You With:

1. **Leverage** for improved practices with respect to **sustainability and statutory planning**.
2. **Efficiency** assessing small to large Planning Permit applications.
3. **Skills** to identify key **ESD and Sustainability features** and ensure **industry credibility**.
4. **Advocacy** towards providing a more **ethical and responsible future**; including an improved and beneficial environment.

Sustainable Design Assessment for Planners - Training Course

Why choose this course:

- This course is designed by Ian Adams from Organica Engineering, who is an experienced public speaker and trainer, regularly providing training at the highest level in the building industry.
- Ian worked as a planning sustainability referrals officer at Knox Council for ten years, and he has assisted many metropolitan Councils with establishing their sustainability assessment in planning and capital works programs.
- He is a certified assessor and trainer for the Green Building Council of Australia, and has extensive experience in implementing Green Star for many projects and in training and facilitation of workshops for the Green Building Council of Australia (GBCA).
- Ian regularly lectures at RMIT and Melbourne Universities on sustainable design and city infrastructure.
- He has been instrumental in helping develop industry toolkits such as BESS, Green Star, and InSite Water, and he has an in-depth knowledge of how to implement sustainable design in buildings.

Determining your SDAPP category		
LARGE	MEDIUM	SMALL
Residential Development of 10 or more dwellings Non-residential 1. Development of a building with a gross floor area of more than 1000m ² 2. Alterations and additions greater than 1000m ²	Residential 50m ² up to 9 dwellings Non-residential 1. Building of a building with a gross floor area between 50m ² and 1000m ² 2. Alterations and additions between 50m ² and 1000m ²	All planning applications other than described in the categories Medium and Large.

How to purchase:

1. Go to www.esd.management and order online; or
2. Contact iadams@organicaeng.com.au for a quote for a combined in-house and onlinetraining package; or
3. Contact Ian on 0409559269 with any questions
